CID Increases Pedestrian Safety and Access in Greater Gwinnett Place

Completed sidewalk project includes enhanced landscaping and tree plantings

(Duluth)— Another heavily traveled pedestrian corridor now includes new sidewalks and landscape beautification for those enjoying what the Gwinnett Place area has to offer.

The Gwinnett Place CID has coordinated the installment of sidewalks along one side of Market Street from Satellite Boulevard to Venture Parkway. The new sidewalks connect to sidewalks the CID previously worked to add along Venture Parkway.

Additionally, significant landscape improvements were made throughout the area, including new sod, ground cover plants and maple trees. The CID worked to clean up years of overgrown right-of-way space and beautified a detention pond near Venture Parkway. Long-term plans call for revitalizing the area to produce a park-like environment.

“Market Street is a key walking area for those frequenting the great restaurants and entertainment venues in the District,” said Joe Allen, CID Executive Director. “These new improvements will prove safer and more pleasant surroundings for those working in or visiting our area.”

At the same time, crews are busy preparing the gateway monument and park at the intersection of Commerce Avenue and Satellite Boulevard. The new pedestrian oasis and the first of the District’s gateway monuments should be complete before the end of December.

More information on CID projects and other District events is available online at www.GwinnettPlaceCID.com.
