

Gwinnett Place,  
Pleasant Hill Road Signal Timing  
(Gwinnett County, GA)

---

Wolverton & Associates, Inc. was responsible for the development, implementation and fine tuning of new traffic signal timing plans for 45 intersections along Pleasant Hill Road, Satellite Boulevard, Steve Reynolds Boulevard and Club Drive to increase the level of service and decrease the travel time for drivers in the Gwinnett Place area. This project was completed for the Gwinnett Place CID, but also included extensive coordination with the Gwinnett County DOT staff since several of the signalized intersections were located outside the limits of the Gwinnett Place CID.
