

Gwinnett Place – The Unique Place To Be In Gwinnett County

Gwinnett Place is truly the central business district of this county, and our area is a top draw year round. Gwinnett Place collectively offers a wide variety of dining, entertainment and shopping attractions that can only be found in our portion of Gwinnett County.

We have some of the newest hotel accommodations, including a new Holiday Inn and other locations that have recently completed multi-million dollar renovations. Gwinnett Place is home to one of the county's tallest buildings – the Atlanta Marriott Gwinnett Place, Gwinnett's premier location for conferences and other special events.

Did you know that we have the only Bahama Breeze in Gwinnett and the only such location in northeast metro Atlanta? We are the only local place to enjoy the expanded menu of a Chick-fil-A Dwarf House. Gwinnett Place also has unparalleled international cuisine from Italian to Japanese and all the choice brand names, from quick snacks to family style dining.

We are the only part of Gwinnett with two malls – Gwinnett Place and Santa Fe. We have the largest indoor international food market in the country, Assi Plaza. Gwinnett Place is the only destination with Fry's Electronics, Sears and The Shane Company. And we are soon to be home to the new Mega Mart shopping experience, the first American opening for one of Korea's biggest retailers.

Gwinnett Place can even claim one of the country's largest dance and music venues – the nationally renowned Will Bill's Dance Club and Concert Hall.

Our area is also uniquely served by the members and leadership of the Gwinnett Place Community Improvement District (CID). The CID joins the interests of area commercial property to expand the economic vitality of greater Gwinnett Place.

As you will hear more in the coming months, Gwinnett Place will soon claim another first-of-its-kind accomplishment – one of the first diverging-diamond interchanges (DDI) in Georgia.

The Gwinnett Place CID is working closely with county, state and federal transportation officials to retrofit the Pleasant Hill Road bridge over Interstate 85 with a DDI, which allows drivers to cross over to the "opposite" side of the road to greatly improve traffic movement.

The DDI is an exciting innovation because it immediately reduces traffic delays, costs less than an entirely new bridge and can be adapted using the existing roadway infrastructure.

So as you can see, there is no summer slowdown for greater Gwinnett Place or the Gwinnett Place CID. We are fully at work to keep Gwinnett Place the place to be, and we invite you and your family to come be part of the action.

To learn more about all the businesses at Gwinnett Place, please take a look at the VisitGwinnettPlace.com site. And more information about the Gwinnett Place CID is always available at GwinnettPlaceCID.com.
